

SHOPEASE – REFUND POLICY

Policy Version: 2026.1

1. Refund Eligibility

Refunds are issued after a returned product has been received and successfully inspected.

For cancelled orders, refunds may be initiated immediately if payment has already been captured.

2. Refund Methods

Refunds are normally sent to the original payment method.

Examples:

- Credit/Debit Card → Original card
- UPI → Original UPI-linked payment account
- Net Banking → Original bank account
- Wallet → ShopEase Wallet

3. Refund Processing Time

After refund approval:

UPI:

1–3 business days

Credit/Debit Card:

5–7 business days

Net Banking:

3–5 business days

ShopEase Wallet:

Within 24 hours

Actual bank processing time may vary.

4. Partial Refunds

A partial refund may be issued if:

- Only some items from an order are returned.
- A product is partially defective and the customer accepts a partial refund.
- A promotional discount affects the refundable amount.

5. Refund for Failed Delivery

If an order is returned to ShopEase because delivery failed, the customer may receive a refund after the returned package reaches the warehouse.

6. Refund Status

Customers can contact support with their order ID to check refund status.

7. Refund Rejection

A refund may be rejected if:

- The returned product does not match the original product.
- The product shows customer-caused damage.
- Required accessories are missing.
- Fraudulent return activity is detected.

8. Important

ShopEase support agents must never promise an exact bank-credit time because processing times depend on the customer's financial institution.
